Call now to be ready  
for the change to 12.5 kHz  
radio equipment!

FCC rules are eliminating 25 kHz  
two-way radio equipment.

Plan now for a smooth and easy transition to  
the change in the FCC frequency requirement.

**BE SURE YOUR EQUIPMENT  
IS COMPLIANT.**

# Call Now! Your 25 kHz radio equipment may not be allowed by the FCC.

**Express Radio**  
10850 Wiles Road  
Coral Springs, FL 33076

To increase spectrum efficiency and to accommodate more users, the FCC is mandating 25 kHz licensees nationwide to operate using 12.5 kHz efficiency by January 1, 2013. New license applications or modifications must meet the 12.5 kHz efficiency by January 1, 2011.

Now is the time to take inventory of your equipment to verify that it is 12.5 kHz capable.

**Motorola equipment meets 12.5 kHz efficiency**—As a trusted leader in two-way communications, Motorola has been preparing for 12.5 kHz technology for over a decade. We offer the broadest choice of two-way radio equipment with close to 60 models capable of operating in 12.5 kHz efficiency. While Motorola radios purchased in the last ten years are likely 12.5 kHz capable, older equipment may need to be replaced. Motorola offers a seamless path to 12.5 kHz, allowing you to transition at your own pace.

**Call us today**—See what you need to do to be ready for a smooth and cost effective transition to comply with the standards and assure continued performance. We are ready to meet with you in a one-on-one consultation and provide the information you need to make informed decisions. Call now!
